Just double-checked on my laptop - SOT is not mentioned. It says NCAC Chapter of SRA.

The attachment says the same as the body of the email, but I attached it this time -

Maureen

It looks like co-sponsor between SRA and the NCAC chapter of SOT right?

Sorry - bb + cat = unfinished email. I didn't realize SRA even had a NCAC chapter.

Wow. I had no idea. I actually belong to NCAC SOT.....George Gray has the lead. Say no more.....really really crappy of NCAC to not ask us to participate! I think that we should contact them- or call George!

Moving Forward With IRIS Reform: Implementing National Academies' Roadmap for Revisions

Wednesday, April 18, 2012, 6:00 - 8:00 PM

George Washington University
The Elliott School Building, Room B12
1957 E Street, NW, Washington, DC 20052

RSVP to: Chris Myers @ cwmyers@gwu.edu

As part of its 2011 review of EPA's draft Integrated Risk Information System (IRIS) assessment of formaldehyde, a National Research Council (NRC) committee included a "roadmap for revisions" that contained a number of substantive suggestions for improving IRIS assessments. Although the report provided a general overview of the topics that needed to be addressed, the committee recognized that a significantly more detailed assessment would be necessary to implement their recommended changes. This panel discussion will examine the key factors to consider for effective implementation, what factors, if any, the roadmap failed to address, and the current responses of both EPA and Congress.

This event is a joint effort of the The George Washington University Regulatory Studies Center, the National Capital Area Chapter of the Society for Risk Analysis, and the The George Washington

University Center for Risk Science and Public Health.

Panelists:

George Gray (Moderator), Director, Center for Risk Science and Public Health, The George Washington University

Lynn R. Goldman, Dean of the School of Public Health and Health Services and Professor of Environmental and Occupational Health, The George Washington University

Yiliang Zhu, Professor, University of South Florida and Committee Member, National Research Council Committee to Review EPA's Draft IRIS Assessment of Formaldehyde

Heidi R. King, Chief Economist, House Energy and Commerce Committee

Chuck Elkins, President, Chuck Elkins & Associates and Former Director of the Toxic Substances Program at the Environmental Protection Agency
